	Testing to see if duel function works
	in list <u>Test Cases</u>
<b>=</b>	<b>Description</b> Edit
	Added two bots (The Hammer, Beta) and selected the duel option.
$\subseteq$	Findings Delete
0%	
	Can add both bots successfully
	Successfully initiated a duel and was declared the winner
	All but one bot image loads
	Successfully moves the two bots selected down into your "duo"
	Kept Testing duels and sometimes all images were shown. Most likely only a select few aren't showing correctly
	Does give random bots each time
